
Company Of Heroes For Linux - Forums, Stats, FAQ

Oct 30, 2009 I need you to update the patch file from v2.201 with this information:

----- 1.Download the entire DLL file (to hard drive) 2.Download the BIN file (to hard drive) 3.Download the executable files one by one (to hard drive) 4.Run the patched executable on your original NON-VCSCORE version of COHOPOP.exe 5.Drop all exe files to your hard drive, (not just to your My Documents) 6.Run the *.exe files and set your Resolution to 800x600, the Audio Settings to Off, and the Audio Sample Rate to 48KHz; this is optional. 7.Contact me. I will update the patch file and send it to you. ----- 8.Other information: ----- • you need to have US version of CoHOPOP.exe downloaded. • you need to have a US version of (Q)BCDE and (Q)BCDE.ini (in My Documents) downloaded. • if you have a different CPU than the below, then you need to use the CPU information I give to you. It is critical that these files are retrieved from the US version of COHOPOP.exe. I have a minimum spec i386/X86 compatible system that can run the US (based on my own testing). May 27, 2010 I've just uninstalled Relic, CoH and COHOPOP, but have the exes installed on the HD. I've taken the exe files and put them on the external HD and then tried to play the game and it's asking me to insert the CD. Apr 24, 2009 Which patches are compatible? I'm trying to run CoH and Opposing forces when I launch the game it says "There is no CD\DVD found. Mar 2, 2009 My problem is that if I try to install COHOOP to the drive and have the exe file for it all of my patches will be removed. Feb 3, 2009 I've just bought COHOPOP and I have its patch to put up and I think I'm able to play it. The problem is when I run the game it gives me this error message saying

Did you know that since the ModYourCar software is our team's most popular download, you can install the entire Company of Heroes - Opposing Fronts Title: Company of Heroes: Opposing Fronts v2.520.1.190 (2013) File Name: [Company of Heroes: Opposing Fronts v2.520.1.190 (2013).zip] File Size: [29MB] License: [MEDIUM] Version: [v2.520.1.190] Warning: [none] [1] Addon Manager. Author: (j) [2] Description This is a mod for the CoH game Company of Heroes. By installing it you agree to have all "developer licences" revoked and are no longer entitled to play the game. You also agree to not modify any files or data except those created by me. * 2011-11-19: The engine has been updated to Company of Heroes 2: The Infiltrator. * 2011-10-13: Over the past week there have been some issues with mods being available for the mod. The patch has been updated to fix this issue and will be re-released

once the mod. * 2015-11-23: A small patch which makes it easier to get the mod running with the new AI/research system. * 2015-10-15: F5F - The bug with infantry units getting stuck by Walls during infantry move has been fixed. * 2015-10-13: F5F - Fixed a mod bug which made two of the patch files broken.

----- Read the manual carefully before using the mod. You can also find more information about the mod here. If you have any problems with the mod please post a comment. I haven't touched the mod since 2012 because I needed to get more experience with modding. I didn't want to damage it with any poor testing and I thought that it would be more convenient for the community if I waited.

Before using the mod please make sure you have a valid CD/DVD. (This mod removes the need for one) If you don't know how to crack install files you can either use VirusTotal or use a crack site. I will provide links to some of them

in the manual. I'm opening up this mod for testing until I get a date set for f678ea9f9e
