#### Rating:

0.5 V 10. Stock asset zombie survival "game." There really isn't anything more to say, other than The Last Mission doesn't even seem to have been tested!

To be honest, there was a period of time I felt that The Last Mission must have been a class project that just got put up for a dollar, but, on further reflection, a school project would probably have been better than this.

Just don't buy this.. This is more pointless than Pain Train. How dare you.
